

Getting Started

Thanks for choosing Bond Blocks! Your Counting to 10 & 20 kit includes everything you need to get started.

- Locate the **USB** that came with your Kit. The USB has everything all together.
 - Note: Kit just arrived? it's a good idea to copy the contents of the USB to your school intranet.
- Watch the **Unboxing Video** to see what is in your kit (on USB and online).
 - Note: Had a kit handed over to you? Use this video to check you have everything.
- Watch the 100-min Level 1 **Video PL** "Introducing The Counting to 10 & 20 Kit" (see USB). Tip: watch this in sections.

Getting Started: Website & Next Steps

A few select files are located only on the USB and are not publicly available on **bondblocks.com**. These include the PDFs of the **activity boards** and 100-minute introductory **video PL**. However, the website has lots of essential, additional **lesson videos, support videos** and **resources** that are not on the USB due to size. Note, this is the Bond Blocks website (bondblocks.com) not Dr Paul Swan's website.

- Get familiarised with the layout of your kit's section of the Bond Blocks Website. Head to **bondblocks.com** and look at the top menu and click on *Counting to 10 & 20 Kit* to open the dropdown.
 - The *grey* menu buttons are for teachers/assistants. They contain the support books and videos that answer common questions.
 - The *coloured* square boxes match the activity boards. They contain the  **videos for each activity**. You'll play these activity videos directly to the students. Scroll down for the activity's mathematics, language and differentiation.
- Select the **implementation planner** that is relevant to you. On the website chose either "Implementation (Tier 1 Class Teaching)" or "Implementation (Tier 2 & 3 Intervention)". Download and read the PDF. Scroll down on the page for implementation tip videos.
- Administer the **test**. On the website choose the "**Assessment**" menu button. Download and read the support book containing the test. Scroll down on the page for assessment tip videos.
